**A novel decentralized edge-enabled PREsCRIPTive and Proactive framework for increased energy efficiency and well-being in residential buildings**

*This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 958284.*

## Consent Form

### Purpose of the study

This document was created in the frame of the PRECEPT project (Grant Agreement N°: 958284), funded by the European Union under Horizon 2020.

The EU-funded PRECEPT project will facilitate smooth and almost zero operational costs for transforming the conventional residential buildings into highly efficient proactive residential buildings. The project will develop new sustainable business models, by making buildings smarter and altering the traditional reactive buildings into proactive buildings. PRECEPT framework will be demonstrated in relevant environments in 5 use cases over Europe, including 250 apartments.

In this context, it is necessary to collect data concerning the energy consumption, the indoor environmental conditions and occupancy related information from selected buildings of the PRECEPT project.

In order to achieve this, you are invited to give your consent to the data collection and monitoring of various parameters, such as energy consumption of the building and of specific devices (e.g., lighting, heating/cooling devices, monitors, and other appliances).
